

IMPACT REPORT:

Silver Key Senior Services

11 CSHF GRANTS since 2016 totaling \$698,300

Silver Key Senior Services is one of the Pikes Peak region's most comprehensive aging services organizations, serving more than 9,250 older adults annually through transportation, nutrition, housing, behavioral health, case management, and social connection programs. Its mission is to create connections that bring purpose, joy, independence, and practical support to the journey of aging.

MILESTONES

- Expanded transportation services, increasing access to healthcare, food, and community resources for older adults in rural communities.
- Developed affordable senior housing, expanded home modification programs, and strengthened supports that help older adults remain safely in their homes.
- Broadened behavioral health, wellness, and care coordination services while increasingly addressing social determinants of health through a holistic support model.
- Implemented the 5 Wishes program, ultimately training nearly 6,000 people and expanding Silver Key's role in end-of-life planning and family preparedness.
- Reframed aging as a long-term journey, shifting from short-term service delivery toward integrated support that can span decades.

"The core has never changed, which is around relationships... building a relationship has been the right formula for Silver Key."

Supporting Aging in Place. Silver Key views transportation, food access, housing, behavioral health, and social connection as interconnected drivers of long-term health and independence.

Emerging Evidence. Silver Key has begun using the validated HOPE Scale to better understand how hope and social connection influence health and well-being. Early findings suggest higher levels of hope are associated with improved outcomes and reduced healthcare utilization.

CSHF Support

CSHF Support Helped Silver Key:

- Expand transportation access
- Develop affordable housing
- Strengthen organizational sustainability
- Support integrated aging-service models
- Advance systems-level approaches to healthy aging

CSHF is amazing. They're supportive, committed to our organization, and forward-thinking about how to move this perspective to other funders.
